EXERCISES**

What is Swimfit?

Swimfit is a combination of pool, gym and studio exercises all condensed into one high intensity pool-based workout.

This instructor lead session targets both aerobic and anaerobic energy systems, using a variety of cardiovascular and sprinting exercises, as well as acting against the resistance of water and buoyancy.

The aim of the class is to introduce a whole new approach to exercise for those who are either looking to improve their level of fitness or someone who wants to lose some weight and improve their health. Swimfit classes will be taken by a qualified Swimfit Activator; who has been trained in applying these training methods and giving useful, friendly advice on how to live a healthier lifestyle.
