FLY-TIPPING!

Fly-tipping is illegal. If you see it taking place, call the **Police** on 999 and report it as a crime in progress.

For serious fly-tipping incidents (pollution risk, hazardous materials etc) call the Environment Agency 24 hour hotline **0800 807 060**.

Report large scale and industrial type fly-tipping incidences to the NFU via the CrimeStoppers dedicated line **0800 783 0137**.

All fly-tipping should be reported to the Council. We cannot clear this waste for free from private land but we may be able to help investigate. Your clean-up costs may be reimbursed after a successful prosecution.

Record as many details as possible:

- vehicle’s registration no. and details
- description of the people involved
- the direction they were travelling
- the exact location
- the date and time that you discovered the rubbish
- details of the items dumped
- photos of the waste and of the fly-tippers if possible

Never put yourself at risk when reporting a fly-tip!

Dealing with fly-tipped waste on your land

Secure the waste
Make sure it cannot escape or be interfered with. This may include erecting a temporary fence or bund to protect people and the environment and preserve any evidence (in situ).

Dispose of the waste
Farmers and landowners are responsible for clearing and disposing of waste dumped on their land.
You can take general fly-tipped waste to Northamptonshire’s Household Waste and Recycling Centres that have commercial waste tipping facilities.

Please visit [www.northamptonshire.gov.uk/hwrc](http://www.northamptonshire.gov.uk/hwrc) for further information and prices.
If you suspect hazardous material contact the Environment Agency for disposal advice.
Before arranging disposal, check with the Council that it has any evidence it needs for any subsequent investigation.
If using a contractor, ensure they are operating legally by calling the Agency on [08708 506506](tel:08708506506) and asking for a waste carrier registration check. Or visit [https://environment.data.gov.uk/public-register/view/search-waste-carriers-brokers](https://environment.data.gov.uk/public-register/view/search-waste-carriers-brokers)
Make sure you obtain a receipt and keep it for 2 years.

Reduce the risk of future fly-tips

Preventative measures
E.g. installation of gates and barriers (but ensure you don’t permanently block rights of way).

Site management
E.g. improve visibility, remove fly-tipping quickly to discourage others.

Deterrence
Consider CCTV and signage.
